

# Hawaiian Plants

What plants are you growing, or would like to grow in your māla (garden) or pā hale (yard)? Click below to learn more about different Hawaiian native plants.

Based on what you saw and read about, what plants would you want to add to your māla or pāhale? What plants might you move? Create a map of where your plants are, or where you would want them to be, using a blank piece of paper with photos and/or drawings, or an online/digital tool. Remember to label your pictures!
